Objective

Computer Engineering student specializing in Backend Development and Software Engineering. Hands-on experience building Java and Spring Boot applications, designing REST APIs, and working with databases and authentication systems. Interested in scalable backend architectures, cloud technologies, and AI/ML. Highly motivated to learn, solve challenging problems, and contribute to innovative engineering teams.

Experience

Devlab LLC | Backend Developer Intern **09/2026 - Present**

- Developing robust RESTful APIs utilizing Java and the Spring Boot framework.
- Implementing secure user authentication and role-based access control using Spring Security and JWT.
- Designing and managing relational database schemas and queries with PostgreSQL.
- Gained hands-on experience with Git, Postman, and Flyway, API testing, Redis caching, Docker.

Budapest University of Technology and Economics | Programming 3 Lab Instructor **09/2026 - Present**

- Conducting practical laboratory sessions for undergraduate students in Java programming and OOP.
- Evaluating student laboratory assignments and homework while conducting code reviews.
- Providing technical guidance and feedback to help students debug code and improve programming skills.

Google Developer Group on Campus BME | Technical Team Core Member **01/2026 – Present**

- Developing backend components of a full-stack enterprise platform using Spring Boot, and PostgreSQL
- Designing and implementing RESTful APIs for event management, QR-based attendance tracking, gamification, leaderboards, and user progress tracking.
- Authoring technical blog posts on core software concepts for Tech Thursday developer education initiatives.
- Managing event technical setup, infrastructure, and troubleshooting hardware/display systems under live constraints.

Emerson | Software Engineer Intern **06/2024 – 08/2024**

- Developed a desktop application in Python to support internal workflows and improve process efficiency.
- Designed and implemented a functional user interface to improve overall usability.

Education

Budapest University of Technology and Economics| Bachelor's in Software Engineering **09/2024 – 01/2028**

- **Awards & Honors:** Stipendium Hungaricum Scholarship Winner

Skills

Programming Languages: Java, Python, C, C++
Frameworks: Spring Boot, Spring Data JPA, Hibernate, Spring Security
Databases & Caching: PostgreSQL, Redis, MySQL, Oracle
Version Control, Tools & Cloud: Docker, Docker Compose, Gradle, Git, AWS S3

Projects

SmartPantry (Spring Boot, Spring Security, JPA, MySQL, Google OAuth2)

- A full-stack inventory management system that tracks food items, monitors expiration dates, and generates smart recipe recommendations based on available ingredients.
- Github: https://github.com/IslamNizami/smartpantry

LockFocusBot (Java, Spring Boot, PostgreSQL, JPA, TelegramBots API, Java NIO)

- A productivity-focused Telegram bot that enforces focus sessions via random check-ins and modifies OS hosts files to block distracting websites upon failure.
- Github: https://github.com/IslamNizami/lockfocus-telegram-bot
